RESOURCE	EXPECTATION	COMMENTS
<b>FUNCTIONAL BEHAVIORAL ASSESSMENT (FBA)</b>		
<b>BS is qualified</b>	The staff who completed the Functional Behavioral Assessment (FBA) is qualified to write FBAs and provide BS services.	<input checked="" type="checkbox"/> <b>MET</b> <input type="checkbox"/> <b>NOT MET</b>
<b>Use of ISP, PRE and other assessments</b>	The behavior(s) of concern identified in the ISP, PRE and or other assessments are taken into consideration in the FBA.	<input checked="" type="checkbox"/> <b>MET</b> <input type="checkbox"/> <b>NOT MET</b>
<b>FBA Behavior</b>	The FBA focuses on behaviors that are appropriate for BS and are either disruptive, destructive, and or disturbing that interfere with the individual's quality of life.	<input checked="" type="checkbox"/> <b>MET</b> <input type="checkbox"/> <b>NOT MET</b>
<b>Defined Behavior</b>	Operational definitions of problem behaviors including prioritization	<input checked="" type="checkbox"/> <b>MET</b> <input type="checkbox"/> <b>NOT MET</b>
<b>FBA Behavioral Hypothesis</b>	The behavioral hypothesis: <ul style="list-style-type: none"> <li>- details the condition, behavior (defined in observable, measurable terms), and function</li> <li>- directly aligns with the Desired Behavioral Outcome (DBO) in the BSP.</li> </ul>	<input checked="" type="checkbox"/> <b>MET</b> <input type="checkbox"/> <b>NOT MET</b>

# CLINICAL REVIEW CHECKLIST

## FUNCTIONAL BEHAVIORAL ASSESSMENT · BEHAVIORAL SUPPORT PLAN · CRISIS INTERVENTION PLAN · GAS

**PARTICIPANT:**  
**BS STAFF NAME:**  
**BS PROVIDER AGENCY:**

<b>Indirect Data</b>	Summary of indirect assessment methods (e.g., interviews, FAI, MAS, FAST, other assessments/checklists) that supports the behavioral hypothesis.	<input checked="" type="checkbox"/> MET <input type="checkbox"/> NOT MET
<b>Direct Data</b>	Summary of direct methods (observations, data collection, graphs, including analysis of data) that supports the behavioral hypothesis.	<input checked="" type="checkbox"/> MET <input type="checkbox"/> NOT MET
<b>Multidisciplinary approach</b>	There is evidence that a multidisciplinary approach was taken in the FBA process.	<input checked="" type="checkbox"/> MET <input type="checkbox"/> NOT MET
<b>Data-driven conclusions</b>	The conclusions made in the FBA are supported by the data.	<input checked="" type="checkbox"/> MET <input type="checkbox"/> NOT MET
<b>Recommendations</b>	Recommendations for ongoing behavioral support are holistic and include considerations for quality of life and the need for additional assessments when applicable (e.g. medical, sexuality, trauma)	<input checked="" type="checkbox"/> MET <input type="checkbox"/> NOT MET
<b>RESOURCE</b>	<b>EXPECTATIONS</b>	<b>COMMENTS</b>
<b>BEHAVIORAL SUPPORT PLAN (BSP)</b>		
<b>Hypothesis</b>	The appropriate information is captured in the corresponding sections (e.g., condition, behavior, function) and are brief and thorough.	<input checked="" type="checkbox"/> MET <input type="checkbox"/> NOT MET
	The behavior is measurable and observable.	<input checked="" type="checkbox"/> MET <input type="checkbox"/> NOT MET
	The behaviors are listed separately in a separate hypothesis if they do not occur together (e.g., occur at the same time, occur in a predictable chain, or occur in response to the same situation?)	<input checked="" type="checkbox"/> MET <input type="checkbox"/> NOT MET
	The function of the behavior is clear (to gain attention, escape, access or for sensory)?	<input checked="" type="checkbox"/> MET <input type="checkbox"/> NOT MET
<b>Desired Behavioral Outcome</b>	The appropriate information is captured in the corresponding sections (e.g., condition, behavior, function) and are brief and thorough.	<input checked="" type="checkbox"/> MET <input type="checkbox"/> NOT MET
	The condition statement is specific enough to provide a cue for supporters to intervene as a natural prompt to trigger the behavior.	<input checked="" type="checkbox"/> MET <input type="checkbox"/> NOT MET
	The condition in the DBO matches the condition in the Hypothesis.	<input checked="" type="checkbox"/> MET <input type="checkbox"/> NOT MET
	The behavior is measurable and observable.	<input checked="" type="checkbox"/> MET <input type="checkbox"/> NOT MET
	The behaviors are listed separately in a separate hypothesis if they do not occur together (e.g., occur at the same time, occur in a predictable chain, or occur in response to the same situation?).	<input checked="" type="checkbox"/> MET <input type="checkbox"/> NOT MET
	The criteria states the mastery in detail and in its entirety and make sense for the behavior.	<input checked="" type="checkbox"/> MET <input type="checkbox"/> NOT MET
<b>Antecedent Strategies</b>	Antecedent strategies are linked to the condition in the hypothesis.	<input checked="" type="checkbox"/> MET <input type="checkbox"/> NOT MET

# CLINICAL REVIEW CHECKLIST

## FUNCTIONAL BEHAVIORAL ASSESSMENT · BEHAVIORAL SUPPORT PLAN · CRISIS INTERVENTION PLAN · GAS

**PARTICIPANT:**  
**BS STAFF NAME:**  
**BS PROVIDER AGENCY:**

<p>-----</p> <p>Antecedent Strategies explain how to prepare the person for the environment or context identified as challenging in the FBA.</p>	<p>The strategies listed are proactive and address ways to help prevent the problematic behavior from occurring.</p>	<input checked="" type="checkbox"/> <b>MET</b> <input type="checkbox"/> <b>NOT MET</b>
	<p>There are sufficient strategies to address the context in which the challenging behavior has historically occurred. (i.e., Are the conditions understood? And do the strategies address what we know about the behavior, historically?)</p>	<input checked="" type="checkbox"/> <b>MET</b> <input type="checkbox"/> <b>NOT MET</b>
	<p>The strategies are written in a way that provides instruction to supporters in their role in implementing the BSP.</p>	<input type="checkbox"/> <b>MET</b> <input type="checkbox"/> <b>NOT MET</b>
	<p>The strategies in this section are appropriate antecedent strategies.</p>	<input type="checkbox"/> <b>MET</b> <input type="checkbox"/> <b>NOT MET</b>
<p><b>Replacement/ Alternative Strategies</b></p> <p>-----</p> <p>Replacement/ Alternative Strategies explain the supporter's role in how to teach functionally equivalent replacement behaviors.</p>	<p>Replacement/Alternative strategies are aligned with the hypothesized function of the behavior.</p>	<input type="checkbox"/> <b>MET</b> <input type="checkbox"/> <b>NOT MET</b>
	<p>The strategies identify skills that the individual can use to promote self-regulation, build tolerance and delay gratification, in a person-centered way.</p>	<input type="checkbox"/> <b>MET</b> <input type="checkbox"/> <b>NOT MET</b>
	<p>There are sufficient skills identified that would be likely to decrease the need for the individual to use the challenging behavior to meet their needs.</p>	<input type="checkbox"/> <b>MET</b> <input type="checkbox"/> <b>NOT MET</b>
	<p>The strategies are written in a way that provides instruction to supporters on their role in teaching and prompting these skills.</p>	<input type="checkbox"/> <b>MET</b> <input type="checkbox"/> <b>NOT MET</b>
	<p>The strategies in this section are appropriate replacement/ antecedent strategies.</p>	<input type="checkbox"/> <b>MET</b> <input type="checkbox"/> <b>NOT MET</b>
<p><b>Consequence Strategies</b></p> <p>-----</p> <p>Consequence Strategies explain how supporters should respond to both the challenging behavior targeted in the FBA as well as replacement or alternative behaviors targeted in the BSP.</p>	<p>The consequence strategies address both (a) how others are going to respond when the individual engages in the replacement behavior as well as (b) how others are going to respond when the individual engages in the challenging behavior.</p>	<input type="checkbox"/> <b>MET</b> <input type="checkbox"/> <b>NOT MET</b>
	<p>The strategies listed for when the individual engages in the replacement behavior, are more than just "provide verbal praise".</p>	<input type="checkbox"/> <b>MET</b> <input type="checkbox"/> <b>NOT MET</b>
	<p>There is information that includes some type of follow up steps or individuation to move to the Crisis Intervention Plan.</p>	<input type="checkbox"/> <b>MET</b> <input type="checkbox"/> <b>NOT MET</b>
	<p>There are enough strategies that explain to the supporter what to do to:</p> <p style="padding-left: 40px;">Prompt alternative /replacement behaviors, decrease reinforcement of challenging behavior, or indicate to move to Crisis Intervention Plan.</p> <p style="padding-left: 40px;">Reinforce replacement behaviors by allowing those behaviors to achieve the function identified in the FBA.</p> <p style="padding-left: 40px;">Reinforce the alternative behavior.</p>	<input type="checkbox"/> <b>MET</b> <input type="checkbox"/> <b>NOT MET</b>
	<p>The strategies are written in a way that provides instruction to supporters on how to respond to different behaviors the individual might use when in the context of the condition statement.</p>	<input type="checkbox"/> <b>MET</b> <input type="checkbox"/> <b>NOT MET</b>
