

Recommendation 12: Provide Community Services to Everyone: ISAC Update

➤ Recommendation 12: Provide Community Services to Everyone

People with disabilities-whether living on their own, with families, or in institutions-are waiting for community services. The goal is to build a system having the capacity to provide services in a timely fashion for all people who need supports.

Strategy #1

Individuals and their families receive SC service; information about local resources and services (e.g., OVR, Medicaid, aging, housing supports, income supports, justice related supports, and victim services); information to connect with family and self-advocacy support organizations; and Family Support Service (FSS) using Base and block grant funding.

Supports coordination should provide individuals and families with tools and support to create a vision of an everyday life that:

- a) Considers local community resources in an everyday life: daily and community living, social and spirituality, healthy lifestyles, security, civic engagement, and advocacy,
- b) Builds on the personal strengths, interests, relationships, resources, and opportunities within the person's and family's lives, and
- c) Serves as the overall framework to provide publicly funded services which align with their everyday life.
